

WHAT IS CLAIMED IS:

1. A fastening device for a radiator, comprising:
A locating part, providing a plurality of secure arms, which are
processed with heat treatment;

5 Whereby, the locating part can support and locate the radiator
and can generate a feature of pressure adjustment.

2. The fastening device for a radiator according to claim 1, wherein
each of the secure arms has an engaging hole for being passed through
by a fastener.

10

3. The fastening device for a radiator according to claim 2,
wherein the fastener is a screw thread component.

4. The fastening device for a radiator according to claim 1,
wherein the locating part is integral made with the secure arms.
